# MINING, BUSINESS AND STOCKS.

# WILL WORK PLACERS **GRAY'S RIVER COUNTRY**

Company Formed to Take Over Thousands of Acres of Placer Ground in Idaho.

Shot gold in extensive placers on the exist for years, and many a miner has spent weary months in a vain search for the ledges from which the eve clusive yellow metal must have been

A few days ago the Gray's River Placer Mining company was incorpor ated under the laws of the state of Wyoming with the principal place of

Wyoming with the principal place of business at Afton, Unita county, the capital stock being \$50,000, divided into \$6,000,000 shares at 1 cent cach, the officers' being Stias M. Wilcox, president; David King, vice president: Francis J. Glenn, secretary and treasurer.

This company has secured 18 quarter section, or 2,880 acres, on Gray's river near the headwaters of the Snake. Here the sands have been tested thoroughly, showing from \$4\$ to \$5\$ shot gold 10 the yard, the depth of the sands being from \$9\$ to 120 feet. Flitteen assays showed an average of \$2.50 to the ton, according to S. M. Wilcox, the original discoverer, who exhibited washings, wherein the gold was plainly visible to the naked eye.

When properly financed, the company expects to put in a large hydraulic plant, one with a capacity to handle term 5,600 to 19,000 tons or dirt every.

plant, one with a capacity to handle from 5,000 to 10,000 tons of dirt every 24 hours, there being an ample water supply in the immediate vicinity of the valuable deposits, and the plan can therefore be operated at a minimum

cost.

Mr. Wilcox says the bed rock of the old Snake will be reached by his company for the first time in the history of placer mining on the Snake or its branches. The screenings show 3.68 ounces gold, or \$73.60 to the ton, according to a recent assay. A test of the sand showed the presence of platinum in paying quantities, also nickel, irridium and molybdenum, in addition to the gold.

#### MARKET LOOKS WEARY.

Trading on Local Stock Exchange Mere Shadow of Former Times,

Trading on the local stock exchange this morning dwindled down to a mere shadow, the vintage of 1893, and it h probable that not one broker made enough in commissions to pay for breakfast for his offic force. It looked like the early days of the exchange and like the hard times of 1893. A few stocks changed hands and a few dollars were spent, but the figures necessary to represent the transactions were ignomin lously few. Even the laundry man could have washed the whole market and not hurt himself. It was nearer a oonful of stocks that changed owner an a handful. There was not a dozen stocks traded

There was not a dozen stocks trauen in. Cedar Talisman brought 12½ and 13 cents; Colorado sold at 64 and 65 cents. Iron Blossom changed hands at \$1 for 300 shares. Sloux hung on at 31 and 31½ cents. Ohio Copper was the only live stock on the board and it calchrated Heinze's negatital by jumponly live stock on the board and it celebrated Heinze's acquittal by Jumpling to \$2.95. There was but little of the stock traded in but it gained 30 points during the session.

The total number of shares of stock traded in this morning was 12,100, while the amount represented by the transactions amounted to but \$3.952.

On the curb market there was considerable activity in Opex, due, it is declared, to the getting of a good cere

declared, to the getting of a good core by the drills. It is said that the core in the new hole is similar to the one taken out some time ago. The sales on the curb this morning were, 1,900 shares of Opex at 52 cents; 400 at 51 and 200 at 52.

GOLD PRINCE MEETING.

Some Changes Made in Official Family Of Pioche Company,

Some good reports were heard at the annual meeting of the stockholders of the Pioche Golden Prince Mining com pany at Pioche recently. The meeting pany at Photoe leading. The finding resulted in the election of the following: M. A. Low, Topeka, Kansas; John Pingree, Ogden, Utah; H. P. Clark and C. H. Thompson, Salt Lake; George E. Poxe, Pioche, as directors of the corporation. The members of the new lead will most at Salt Lake for or. ward will meet at Salt Lake for or

is understood that the active oper-in of the Golden Prince properties to be commenced immediately follow-the resumption of railroad traffic ing the resumption of railroad traffic to the district. Like many other mines in the camp, the Golden Prince was obliged to cease operations soon after the washout of the Salt Lake Route in the vicinity of Callente. It is likely that the Gold & Silver Prince Mining company, controlled by Golden Prince Interests, will resume work about the

Golden Prince directorate is seeded H. C. Harmond and B. L Chris-

CONCENTRATES.

A. N. Holdaway, manager of the Tintic Central is up from Provo today

F. M. Orem of the Nevada Douglas Copper company has returned from a business trip to Chicago.

L. A. Friedman, manager of the Seven Troughs Coalition company, left yesterday for Hot Springs, Ark.

W. J. Merritt, manager of the Red Warrior Mining company, was in the city yesterday on his way from his ranch in Montana to the mine.

Jules Labarthe, the smelter expert for the Gunn-Thompson interests, and who is building the new Mason Valley Mines smelter, is expected in Salt Lake in a few days to confer with George E. Gunn. The rebullt and enlarged smelter of the old Needles smelter, now owned by the United States Smelting, Refining and Mining company, will be blown in within a few days, according to Man-ager L. D. Goodshall.

J. W. Charlton, who has had large

g. w. Charitoh, who has had large experience as a mine manager in South Africa and New Zealand, since leaving Montana a number of years ago, has arrived in this city with the intention of making Utah his future home. Hermon W. Horne, a Salt Lake engineer, who has been in the Jarbidge country for several months, has returned. He says that the rosy tales of Jarbidge all had a thorn in them. The camp he declares might make good, but there are not the showings there that should cause the rush to the country that there was.

Fred R. Davis has just returned from Charleston, a camp 15 miles west of Jarbidge. Mr. Davis declares that the Jarbidge excitement has caused the spreading out of a large number of prospectors over the northern Nevada country. Mr. Davis went to inspect the property of the Rescue Mining and Milling company, a Salt Lake organization, the stock of which is held very closely.

A telegram received yesterday by John A. Kirby from Manager W. H. Webber of the Nevada Hills property, announced that the ore had been encountered in place in the ledge east of the fault, on the 470-foot level. The message said that the ore averaged over \$40 a ton for the full face of the drift and that on the footwall was a streak of several inches of tale carrying \$500 in values. This strike is in sulphides and the values are as strong as in the oxides.

in the oxides.

J. E. Pettit, state coal mine inspector, has made a favorable report of a series of tests of steelite, the new explosive. Claims made for steelite as a blasting powder are that it entits no fumes, that it eliminates danger from premature explosions and that it is highly effective. While the tests made by Mr. Pettit were not exhaustive, they appear to substantiate the claims. The powder is manufactured only in Europe and none of it is imported to this country, but the building of factories here is contemplated. here is contemplated.

# ENGINEERS FAVOR THE UTAH GOPPER MILI

Quarterly Report of Company Tells of Method of Increasing Old Boston Consolidated Mill at Arthur.

According to the first quarterly reort of the Utah Copper for the year 1910 the production averaged in excess ome interesting details as to the mills of the company are also given. The report, which is signed by President J. M. MacNeill and General Manager

Following will be found statements of the results of the operations of your company's properties for the months of January. February and March, comprising the first quarter of the fiscal and calendar year 1910.

March, comprising the first quarter of the fiscal and calendar year 1910.

This report covers the operations of the properties of the Utah Copper company proper for the month of January, including only the outputs of the Garfield and Copperton plants for that mouth. On the first of February the operations of the Boston Consolidated Mining company's properties recently acquired were taken over, and the report therefore covers the results from the Consolidated properties, including the Boston Consolidated company's mill at Garfield (which will hereafter in all reports be referred to as the "Arthur plant") for the months of February and March, During the months of January and February we continued to suffer through a lack of transportation facilities to the extent of a loss of tonnage in January as compared to the full capacity of the plants in operation and covered by this report, of 45,000 tons, and a similar deficiency in tonnage for the month of February amounting to 38,000 tons. During the tons, and a similar deficiency in tonnage for the month of February
amounting to 3x,000 tons. During the
month of March all plants were suppiled with their full requirements,
and we accordingly operated them at
their full capacity, approximating
12,500 tons per day. This was the first
month since October last year during
which such transportation facilities
were provided as to permit us to ship
to the plants their full tonnage.

The ore treated for this quarter
showed a slight improvement with the
last, both as to grade and character.
The increase in copper contents was,

last, both as to grade and character. The increase in copper contents was, however, only 8-10 of a pound per ton. The gross output of copper contained in concentrates produced during this quarter was 18,511,819 pounds, as compared to 13,291,210 pounds for the last quarter of 1909. This increase in production, amounting to over 5,200,000 pounds as compared to the previous quarter is due in part to the output from the Boston Consolidated property for the months of February and March, but about requally to the increased output of all mills due to the improved transportation service which permitted of their operation at full capacity for only the single month of March.

GROSS PRODUCTION. The gross production by months for the first quarter of the present fiscal year is shown in the table below:

Total for first quarter .. 18,511,819.lbs The output for the month of January did not include any production whatever from the Arthur plant. The output stated for the months of February and March did include the production from the Arthur plant.

The net profits from mining and miling operation for the output for the output for the courter.

miling operation for the quarter amounted to, \$858,782.71.

The additional income from rents and other incidental items amounted to \$13,174.91.

Total net profit for the quarter, \$871,937.62.

In the above stated profits no account is taken of any revenues other than those immediately incidental to our direct operations in Utah and the income from dividends from the company's ownership of shares of the Nevada Consolidated Copper company is therefore not included in any way.

pany is therefore not included in any way.

The average price of copper upon which the above earnings were based was 13.33 cents per pound, as compared to 13.15 cents, the price applying to the last previous quarter. At the close of the quarter all copper due for delivery from refineries had been sold, and the entire product due for delivery up to the early part of July had been disposed of.

The average cost of copper per pound for the quarter was 8.43 cents as compared to 8.48 cents for the previous quarter. The average cost per pound at the Utah company's Garfield plant, now known as the "Magna" plant, was considerably lower, having been for the month of March 7.5 cents, but the considerable quantity of copper coming from the "Arthur" plant, upon which the per pound cost was greater, resulted in raising the average cost to the figure above stated. The average cost of copper resultant only from the Utah company's original mills approximated 8 cents per pound. The average cost of milling for the quarter was decreased as compared to that of the previous quarter, but the average cost of milling for the quarter was decreased as compared to that of the previous quarter, but the average cost of milling for the quarter was decreased as compared to that of the previous quarter, but the average cost of milling increased somewhat on account of the necessity of continuing for the time heing the mining of ore from the Boston Konsolidated's properties by undergrown methods. The tomage of ore mined in this way amounted to 17 per cent of the total shipments as indergrown methods. The tonnage re mined in this way amounted to of ore mined in this way amounted to 17 per cent of the total shipments as compared to 3 per cent for the last quarter. Underground mining will be discontinued on Hoston Consolidated ground, as it has previously been on Utah, as quickly as stripping can be sufficiently advanced to permit of the full tonnage being mined by steam shovels. Stripping has already been resumed on Boston Consolidated ground where it was discontinued by the Boston Consolidated Mining company some time ago.

ENGINEERS ENGAGED.

At the time of the acquisition of the operation, a corps of mappendent ellgineers was engaged to examine and
report upon the relative merits of the
systems of milling used in the "Magna"
plant and that of the "Arthur" plant,
and upon the best plans for enlarging
the capacity of the latter. Their findings show a decisive advantage, both
as to costs and recoveries, in the methods heretofore and now employed in
the "Magna" plant; and furthermore,
that by adopting in the "Arthur" plant
similar appliances and methods, its
capacity can be more than doubled
without extending the present buildings otherwise than to provide storage
hins for ore reserves proportionate to
the increased capacity.

This report fully confirms the previous determinations and reports of our

This report fully confirms the prea vious determinations and reports of our
own engineers, and work has been commenced upon the remodeling of the
s"Arthur" plant along lines that will
make it conform as nearly as possible
to the "Magna" plant, both as to maordinery and method.

In the statement of ore reserves appearing in the annual report just issued for the year 1902, no account
was taken of the ore reserves of the

ORE DEVELOPMENTS.

In considering the above stated ton-mages it is to be remembered that both the Utah and Boston properties still have undeveloped large areas known to contain both laterally and in depth, ore bodies similar in character to those already developed; but without consid-ering such areas the ones which are

ering such areas, the ones which are fully and partially developed as stated, would at the present rate of produc-tion enable the plants as today exist-ing to operate for a period of 40 years, and at the inreased capacity which will follow the increase.

will follow the improvements now der way and which will, within a from the present time, be applied life of the present ore reserves of pempany would be about 30 years.

SOON TO MAKE SHIPMENT,

than when he took hold of the property he declares.

"We expect to ship a carload of the lead-silver ore next week, said Mr. Ferguson. "This will be about \$25 ore and should net the company something like \$25 to \$30 to the ton. There is a wagon haul cost of \$2, freight, \$2.50 and an average sinelter charge of \$3, though some of it costs but 75 cents a ton, and a limit of \$5 for treatment. We ship to the American Smelter at Garfield.

Garfield.

"The recent strike on the 500-level continues looking favorable. We are cutting a station there now: doing some up-raising on the ore vein to the 400-level, and by next week expect to sink a winze from the station on the ore, which seems to continue good and strong as we gain depth on the vein. "Some of our zine showings, especial."

ly on the 125-foot level of the old property, are encouraging. This zinc ore contains neither lime nor iron, and is especially desirable on that account. It is the best in the state. We ship it to Oregon, and this 40 per cent rock nets us from \$23 to \$28 a ton.

"The mine generally is in a very healthy condition, according to my nominon."

**BUSINESS AND REALTY** 

Architect A. O. Treganza has sold his

handsome bungalow residence at Eliza-beth and Sixth South streets to Walter Robert for \$7,000. The property covers 50x132 feet, and the transaction is con-sidered a good one for the purchaser. The death of his wife is the occasion of Mr. Treganza's disposing of the property.

Extent for light buying of the lowrleed Gould stocks which pushed Waash up 1 and Wheeling & Lake Erie
cond preferred by there was no feature
this market which grew steadily

Boston Consolidated properties, because those properties were not acquired until after the close of the fiscal year. In that report ore reserves in developed and partially developed ore on Utah ground alone were stated to amount to 96,000,000 tons. The Boston Consolidated properties contain similarly developed ore to the amount of 40,006,000 tons. In addition to these tonnages, there is the somewhat lower grade tonnage referred to in the last three anual reports, estimated at 40,006,000 tons. This additional tonnage lies entired below our present main working levels and is only partially developed by a limited number of winzes and diamond drill holes, but sufficiently, however, to insure the presence of the tonnage stated, of a copper content sufficient to make it commercially profitable even under existing operating conditions. As a matter of fact, this additional lower grade tonnage is of practically the same grade as that upon which our operations have been exclusively conducted for the last six months.

Summing up the entire ore reserves of both properties, the total, as detailed above, amounts to 170,000,000 tons, all of which is of a grade equal to that upon which we are now operating, and a large percentage of it is of a much better grade.

## CONFESSES JUDGMENT.

Confession of judgment for \$84.61 was entered in the district court today by the defendant in the case of the Mine & Smelter Supply company against the Adirondack Mining company.

# SALT LAKE ROUTE WILL RESUME JUNE 15

Dispatch From Los Angeles Conveys Cheering Intelligence to People Of This Vicinity.

That trains will be running between Salt Lake and Los Angeles again be fore June 15 was the cheering intelligence which came over the wire from the southern California town this morneral freight and passenger agent of the Salt Lake Route this morning received a dispatch from Los Angeles saying that through traffic will be resumed between Salt Lake and Los Angelo not later than June 15, which means that it may sooner than that date, and according to calculations made in this city, it may be a week or 10 days

sooner.

"This is good news to us." said Mr.
Manderfield this morning, "and I believe it will be good news for everybody. We have all missed the Los Argeles train. The Butte office of the
Sait Lake Route will be reopened on
June 1," continued Mr. Manderfield,
"and we shall begin at once to employ
men to make up the enlarged force
which will be necessary in the Sait
Lake office of the road. We are getting
ready for a heavy business this summer, and the road will be in condition
to handle everything that comes." to handle everything that comes.

#### BAMBERGER ROAD READY.

Electricity will be turned into the trolley wires of the Salt Lake & Ogden railroad on Saturday, according to an announcement made by Simon Bamberger, president of the road, Thursday afternoon, for the purpose of "breaking in" the ear crews. Just as soon as the men have learned how to manage the big cars and have become familiar with all the conditions along the line of the road, regular service will be commenced. Through cars will make the trip to Ogden in one hour, Mr. Bamberger believes, and local cars in an hour and a quarter.

#### FOR BETTER PROTECTION.

Fish and Game Committee of Commercial Club Get Busy.

The Commercial club's committee or day afternoon and appointed a committee, composed of James H. Anderson John T. Sharp and Harry S. Margetts, to draft a resolution to be presented to the board of governors showing the need of better enforcement of the game laws. The state is planting mil-lions of fish fry, many of which are destroyed through inadequate protec-tion of streams. The irrigation ditches

0 per cent commission for selling fish-ng licenses. The committee thinks hat the advantage to these places where licenses are sold was sufficient vithout remuneration. ontributed to the protection of game

## MINING ENGINEER HURT.

E. P. Jennings Slipped and Fell, Injuring Back-Unable to Travel.

ing engineer of this city, met with a very painful accident while making an inspection of one of the U. S. Copper company properties at Bingham a fee days ago. While in one of the shafts he accidentally slipped and fell quite a distance, severely injuring one knee, straining his back and suffering internal injuries. The doctor says he has wrenched or torn loose part of the lining of the liver. Everything is being done to place Mr. Jennings in a condition to travel, as he has an extremely important meeting in Boston and was due to leave here last Wednesday to carry data secured while on his unfortunate trie. It is possible he may be gotten in condition to leave today, or the forepart of next week, as it is imperative that he reach Boston as quickly as possible. a distance, severely injuring one knee
